Consultants have 10-30 years of experience

MAXIMIZE DATA VALUE THROUGH ANALYTICS

Healthcare and Life Sciences (HC/LS) organizations are inundated with ever increasing volumes of data and the challenge of unlocking maximum value through analytics. Key objectives are to transform data into actionable information and insights that improve patient outcomes, reduce costs and achieve business objectives.

RGP works closely with organizations across the HC/LS continuum to identify information requirements and develop solution strategies and architectures that enable the application analytics to support patient health, data standardization and integration challenges.

DATA ANALYTICS SOLUTIONS

RGP’s data and analytics solutions reside in four pillars: Strategy, Data Governance, Data Management, and Business Intelligence & Analytics.

Our deep industry experience and best practices focus on maximizing the value of data and analytics by improving processes, skills and utilizing artificial intelligence, machine learning, and robotics automation technologies.

Data Analytics SMEs are adept at identifying the specific services that best match any client’s needs, as well as Data Security and HIPAA/GDPR compliance.

PLANNING & STRATEGY

- Identify Strategic Enterprise Data Needs
- Develop & Maintain the Data Strategy
